  Completed in 2022

About Me

I'm Mathankumar and i'm from Paramakudi, Ramanathapuram District. I completed my 12th grade at Sourashtra Higher Secondary School. Then I Joined FSSA. In the Academy period, I have learnt Life skills and Full stack web development with best practices. Whatever i have learnt in the full stack web development I have hands-on experiences with projects.

Projects

Spartans Market Town (SMT)
(HTML, CSS, JS, Java, JSP, Servlet, JDBC and MySQL)

About the Project:
- Project Name is Spartans Market Town. It is an e-commerce website for a mall.
- This project was mainly focused on e-commerce websites.
- In that, I have developed the following pages, that make users a great shopping & booking experience.

Key features:
- Provided a feature that allows the user to view all products in the specific shop.
- The shop search feature helps the user to find the they want shop details.
- Order History feature that allows customers to view details of their past orders on the order history page.
- The Order Tracker page enables customers to monitor the status of their deliveries
- Secure Payment Options
- The shopping cart feature is where customers collect the items they want to buy.
